The Audi Hungaria Motor Kft. is currently the largest engine factory in the world. Its activities include production of engines and engine components and car production with related tool manufacturing; these are fulfilled by more than fourteen-thousand employees in Gyor. In 2015 more than 2 million engines were produced here and the factory gave 9% of the total Hungarian export. In the car factory belonging to the company 160 thousand cars were produced in 2015, among these are A3 Limousine, A3 Cabriolet, Audi TT Coupé and TT Roadster types to be found.

AB Consulting has supported the operation of Audi Hungaria since 2007 through the implementation of new SAP solutions, supporting existing SAP modules and further developing these.

We serve the complete spectrum of business management, enhancing corporate effectiveness by applying the most novel SAP technologies. We recently implemented for example the SAP EWM solution, which – integrating the supplier and goods movement processes – opened up new perspectives for the flexible and automated real-time warehousing.

Our key to success at Audi Hungaria is our people-centered, reliable and premium consulting, project management and support service.

Many of our colleagues work constantly for the satisfaction of our customer, guaranteeing the highest quality of service.
